Profile

Motivated and quick-learning backend developer with hands-on experience in building full-stack web applications using Node.js, Express.js, MongoDB, and React. Strong foundation in JavaScript, REST APIs, and modern web technologies. Passionate about problem-solving and building scalable applications.

Internships

BACKEND NODE DEVELOPER | BLUEFOX PVT LTD. | MARCH 2025 – JUNE 2025

- Assisted backend teams on developing the RESTful APIs of different projects.
- Implemented JWT (Token based authentication), cookies, password hashing with bcrypt.
- Designed and implemented MongoDB schemas and Mongoose models for application features.
- Used schema validation for the clean and integrity of data.
- Implemented data validation using mongoose schemas.
- Worked with referenced and embedded documents to manage relationships.
- Used postman to test the API.

Education

BACHELOR OF INFORMATION TECHNOLOGY | 2021-2025 | CENTRAL CAMPUS OF TECHNOLOGY, DHARAN, SUNSARI

+2 IN SCIENCE | 2018-2020 | SHREE SHANTI BHAGAWATI SECONDARY SCHOOL, LETANG, MORANG

SEE | 2018 | GALAXY ACADEMY, LETANG, MORANG

Skills & Abilities

- **Languages & Frameworks:** JavaScript, React, NodeJs, ExpressJS, Tailswind CSS
- **Databases:** Mongodb with Mongoose, Mongodb Atlas
- **Markup Language:** HTML, CSS, PUG
- **Other External Tools/Libraries:** Bcryptjs, CORS, axios, ESbuild, json-web-token, Eslint, Leaflet
- **Tools:** Github, Postman, Mongodb Compass, Mailtrap
- **DevOps Tools:** Docker, Nginx

Courses

4 days frontend web development bootcamp(HTML5, CSS3, Bootstrap 5, JavaScript, RESTful API and Vue JS), Code IT, School of computer science

Node.js, Express.js, MongoDB and more: The complete bootcamp, Udemy

The complete JavaScript course 2025, Udemy

Projects

NodeJs Projects:

Natours: Developed a full-stack tour booking website using Node.js, Express, MongoDB, and Pug. Implemented features like user authentication, tour search, map integration, booking system with ESEWA API, and MVC architecture for clean and scalable code structure.

Github-link: <https://github.com/crestharpn/Nodejs/tree/main/Natours>

Live on: <https://natours-tours-vm35.onrender.com/>

Housingfy: Designed and developed a RESTful API for a fictional web service using Node.js, Express- , and MongoDB. Implemented CRUD operations, user authentication, and request validation with a modular MVC structure for scalability and maintainability

Github-link: <https://github.com/crestharpn/Housingfy-Backend>

NodeFarm: Built a simple and dynamic product website using core Node.js (no frameworks). Implemented custom routing, server-side rendering, and file-based templating to display farm product data from a JSON API.

Github-link: <https://github.com/crestharpn/Nodejs/tree/main/nodeFarm>

Live on: <https://farmnode.onrender.com>

React Projects:

Eat N' Split: Developed a bill-splitting app using React, allowing users to manage friends and split expenses easily. Utilized component-based architecture, state management with hooks, and dynamic form handling for a responsive and user-friendly experience.

Github-link: <https://github.com/crestharpn/React-projects/tree/main/split-bill>

Travel List: Built a travel packing checklist app using React, allowing users to add, mark, sort, and delete items. Utilized state management with hooks, conditional rendering, and component composition to create an interactive and efficient user experience.

Github-link: <https://github.com/crestharpn/React-projects/tree/main/split-bill>

Javascript projects:

Bank Application: Created a responsive and interactive banking UI using HTML, CSS, and JavaScript- . Implemented features like user login, transaction history, fund transfers, loan requests, and account closure with dynamic DOM manipulation and state handling.

Github-link: <https://github.com/crestharpn/Basic-JS-Projects/tree/main/Bankist-app.js>

Roll The Dice: Built a two-player dice game using HTML, CSS, and JavaScript, featuring dynamic UI updates, turn-based logic, and state management. Applied event handling and DOM manipulation to create a responsive and engaging user experience

Github-link: [https://github.com/crestharpn/Basic-JS-Projects/tree/main/Pig-Game\(DOM%20MANIPULATION\)](https://github.com/crestharpn/Basic-JS-Projects/tree/main/Pig-Game(DOM%20MANIPULATION))
